IV Solutions

Together, We Can Care Better

**FRESENIUS
KABI**

From Fresenius Kabi, one of the largest manufacturers of IV bags in the world.

Over
1.4
Billion units of IV
fluids produced
annually¹

Fresenius Kabi may be new to you, but our heritage goes back more than 100 years. As a global health care company, we are a leader in high-quality injectable drugs, infusion, transfusion and clinical nutrition products. Headquartered in Europe, we have unique scientific capabilities and state-of-the-art manufacturing and distribution facilities around the globe and across the U.S.

1. Fresenius Capital Markets Day 2023 Presentation; Page 25

All free*flex*[®] IV bags are created with these exciting features that may help clinicians deliver infusions safely and efficiently.

- **Leak Prevention**

Both **free*flex*** ports contain a self-sealing septum to help prevent leaks after removing a needle or spike, and may help reduce potential risk of hazardous exposure.

- **Sterility Protection**

Both ports contain easy break-off caps, providing visual tamper evidence to help ensure sterility prior to use.

- **Needle Stick Prevention**

Semi-rigid ports help prevent needle sticks during drug injection.

- **free*flex* IV Bags are not made with PVC or DEHP**

Minimizes patient exposure to toxic DEHP, contained in PVC.¹

Across its life cycle (from manufacturing to use to disposal), PVC creates and relies on chemicals that are highly hazardous to humans and the environment.¹

free*flex* IV bags can be used across your facility for a broad clinical application.

1. Health Care Without Harm. Why Health Care is Moving Away from Hazardous Plastic Polyvinyl Chloride (PVC). 6 April 2006.

All **freeflex** IV bags are designed with the clinician in mind, and may help reduce infusion errors, injury and waste so they can focus on patient care.

Added Features of freeflex

- Unique blue and white ports indicate flow and function that may help prevent errors and have wide spacing for easy handling.
- Clear, easy-open overwrap.

Helping Improve the Safety of IV Drug Delivery

Clinicians and patients put their health and well-being in the hands of pharmacists every day. So, you work hard to equip your clinicians with products that help them deliver infusion care that is safe and efficient.

At Fresenius Kabi, we collaborated with nurses, pharmacy technicians and pharmacists to engineer simplicity and safety into every feature of our innovative IV bags. That's how Fresenius Kabi brings **confidence within reach**.
