freeflex® IV bag features are innovatively designed to help clinicians deliver infusion care safely and efficiently

freeflex®

At Fresenius Kabi, we worked with pharmacists, pharmacy technicians and nurses to develop our unique **freeflex®** bag technology for ease of use. Features such as our easy-open overwrap; clear, distinct labeling; and tamper-evident break-off cap demonstrate our ongoing commitment to innovation in infusion therapies.

freeflex IV Bags are not made with PVC or DEHP¹

Minimizes patient exposure to toxic DEHP, contained in PVC.¹

Across its life cycle (from manufacturing to use to disposal), PVC creates and relies on creates chemicals that are highly hazardous to humans and the environment.¹

One IV bag can be used across a facility, for a broad clinical application.
