

# IV Therapy & Irrigation

featuring **freeflex**® and **soluflex**™ bag technology

**freeflex**®

**freeflex**®+

**soluflex**™

Partner with one of the most  
experienced solution manufacturers  
and innovators in the world:  
**Fresenius Kabi.**

**Fresenius Kabi offers a robust portfolio of IV therapy products designed to give pharmacists and clinicians the flexibility they need to prepare medications and provide fluids, electrolytes and calories across the full IV continuum of care. We also offer an expanding line of irrigation products and administration sets.**

We combine our 100-year heritage in health care with our ability to innovate in order to improve our customers' ability to deliver health care every day. We are focused on working with healthcare professionals to enhance our product portfolio to help meet our customers' clinical and operational needs.

We understand what you need most is a consistent supply of smart, well-designed products, and a portfolio that gives you the ability to work the way you want to at your facility.

**We are committed to earning your business every day.**

**Did you know?**  
Fresenius Kabi sells  
**1.4 billion units of**  
**IV fluids annually.**

**FRESENIUS  
KABI**

# Empowering health care through flexibility and choice.

We offer an extensive portfolio of quality products clinicians need for drug reconstitution, admixture and the delivery of fluids across the IV Therapy continuum of care.

The comprehensive Fresenius Kabi portfolio meets a broad range of clinical and operational needs. We offer convenient fill sizes depending on the product, with more than 70% having a 36-month shelf life to help hospitals reduce waste.

**From base solutions to compounding, our technologically advanced portfolio has been designed to help you do your job safely, efficiently and effectively across your facility.**

## Supplying confidence every day.

We've invested nearly \$1 billion in a robust distribution and manufacturing footprint to create supply reliability with redundancies across the country, backed by our global network.

As part of our U.S. investment, we've expanded our IV bag production by opening a vertically integrated, state-of-the-art facility in Wilson, NC, supported by plants in Utah, Germany and Norway. We can reach any customer in the continental U.S. within 48 hours.

**In fact, we are known for responsiveness, open communications and the ability to deliver when others can't.**

# Not all bags are the same. Experience the difference.

Our innovative **freeflex** and **soluflex**™ platforms were developed together with pharmacists, technicians and nurses to help meet their needs in the pharmacy and clinical areas.

Fresenius Kabi has developed bags designed with the clinician in mind that feature unique additive ports.

<p><b>Fluid and Electrolyte Replacement &amp; Maintenance</b></p> <p>Standard injection port with self-sealing membrane, allows for up to 5 injections of medication.</p> 	<p><b>Drug Reconstitution &amp; Admixture</b></p> <p>All the features and advantages of <b>freeflex</b> - plus a unique Luer Lock additive port to facilitate needleless drug addition.</p> 	<p><b>Irrigation Solutions</b></p> <p>An expanding line of irrigation solutions featuring <b>soluflex</b> irrigation bags and irrigation sets.</p> 
<p><b>freeflex Accessories</b></p> <div><p><b>freeflex Locking Protective Cap</b> Bright red cap to indicate drug has been added. Snaps on easily and offers protection against tampering.</p></div> <div><p><b>freeflex+ Transfer Adapter with Luer Lock</b> A convenient twist-on vial adapter for 20mm vials for use with <b>freeflex+</b> IV bags.</p></div> <div><p><b>freeflex Spiked Secondary Sets</b> Secure connection to help avoid spills for use with <b>freeflex</b> IV bags.</p></div>		

## Both **freeflex** and **soluflex** bags feature...

- **Administration port with integrated flow stop:** Prevents free flow from bag upon unexpected removal of spike from administration port.
- **Not made with PVC and DEHP:** Can be used across a facility for a broad clinical application.
- **Leak prevention:** All ports contain a self-sealing membrane to help prevent leaks after removing a needle or spike, potentially reducing risk of hazardous drug exposure.
- **Sterility protection:** All ports contain easy break-off caps, providing visual tamper evidence and to ensure sterility prior to first use.
- **Semi-rigid port design:** Helps prevent sharps stick injury during drug injection or spike insertion.
- **Peel-open film overwrap for freeflex bags:** Clear, easy-to-open overwrap allows for visual inspection prior to opening.
